### **Re: Tailift Forklift 2.5t: PTA00202**

We are currently in possession of the above mentioned Tailift forklift since its acquisition in 2016.

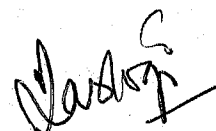

The nature of our business places a significant amount of stress on our forklifts which are of utmost importance in the daily functioning of our Company. Our operation demands consistency and efficiency from our forklifts which is paramount to the relationship between downtime and productivity. Further, in order to meet operational demands there needs to be a more than satisfactory turnaround time from the service provider maintaining our forklifts. In light of the above, the Tailift forklift has met all the challenges it has been faced with over the past 4 years with relative ease. As per our forklift drivers, driver comfort as well as drivability has been positively affirmed.

The exceptional service provided by Forkman and their ever willingness to attend to services and breakdowns, if any, timeously and efficiently has largely contributed to the Tailifts success at our plant.

This successful partnership between the Tailift forklift as a product and Forkman as its maintenance service provider has motivated our Company to purchase another Tailift forklift. We are confident that going forward, we will endure another 5 years of exceptional service from both the Tailift forklift that has now been purchased as well as Forkman as the service provider thereto.

With our experience Tailift forklift is comparable to Toyota forklift and we gladly recommend this forklift.
